## Shell Script

Aim:
To write a Shellscript to test given year is leap or not using conditional statement

Program:

```
read n
if [ $(( $n%4 )) -eq 0 ]
then
    echo "Leap year"
else
    echo "Not a leap year"
fi
```

Enter number
2019
Not a leap year

✓

Result:

Program is executed and output is received in shell script using conditional statements and modulo function.
